An aerial photograph of a desert landscape, showing a winding path or road that curves through the terrain. The colors are warm, ranging from light tan to deep orange and red. The path is well-defined and leads the eye from the bottom left towards the top right of the frame. The surrounding terrain is textured with small rocks and subtle ridges.

COLOR AND BEAUTY,  
TRUST AND FRIENDSHIP

PEKA CHEMIE  
INDUSTRIAL COMPANY

[www.pekachemie.com](http://www.pekachemie.com)

Peka Chemie's powders are available in a wide range of colors. We recommend them for various applications, including:

- Architectural
- Urban
- Industrial
- Exterior
- Interior

The provided sample plates serve as a visual guide. Please note that the final application of these powders may not be an exact match to the samples due to variations in production procedures and pigments.

**Quality and Compliance:**

- Powders with QUALICOAT approval are available upon request.
- Our Epoxy powders hold potable water certificates.
- FBE (Fusion Bonded Epoxy) powders are also available. Due to their specific application thickness, they are not included in this color chart. For further information or specific requirements, please do not hesitate to contact us.
