Peka's metallic powders are available in different colors, we recommend using them for different fields such as Architectural, Urban, Industrial, Decorative, Exterior and also Interior usages.

The Bonding of all sample plates can also be produced along with dry blends.

These sample plates should be used as a guide; however, it doesn't mean your application of these powders is guaranteed and comparable with the samples due to differences in production procedures and their pigments.

Powders with QUALICOAT approval are also available.

For further information, do not hesitate to contact us.
